Professional Summary

Data Engineer with hands-on experience in SQL, Python, PySpark, Azure Databricks, and Azure Data Factory. Proven expertise in data migration, ETL pipeline development, and implementing Medallion Architecture for scalable data solutions.

Technical Skills

Programming Languages: SQL, Python, PySpark, Java

Cloud Platforms: Microsoft Azure, Azure Databricks, Azure Data Factory (ADF)

Data Technologies: ETL/ELT Pipelines, Delta Lake, Unity Catalog, Medallion Architecture, Teradata

Tools: SQL Server Management Studio (SSMS), Visual Studio Code (VS Code), Git

Professional Experience

Celebal Technologies

April 2025 – Present

Data Engineer

Jaipur, Rajasthan

Data Migration Accelerator Tool

- Contributed to a data migration accelerator converting Teradata, SAS, Azure Synapse, and Snowflake workloads to Databricks.
- Created synthetic datasets and implemented Medallion Architecture (Bronze, Silver, Gold) in Databricks based on structured technical scripts.
- Executed end-to-end data validation and reconciliation to ensure schema consistency and transformation data accuracy.

Enterprise Client - Presales Assessment

- Reviewed stored procedures, nested procedures, and dependent tables to estimate migration effort and provide technical feasibility assessment.
- Analyzed joins, dependencies, and transformation logic to determine migration scope and identify potential challenges.
- Created Excel reports tracking object count, nesting levels, and complexity metrics for project estimation.

Projects

Azure End-to-End Data Engineering Project (Spotify Dataset)

Nov 2025 – Jan 2026

- Designed end-to-end data pipelines using Azure Data Factory for incremental and automated data ingestion from Azure SQL Database.
- Performed data transformations using PySpark in Azure Databricks, including streaming ingestion and Delta Lake optimization.
- Built analytical data models using Star Schema and implemented Slowly Changing Dimensions (SCDs) for historical tracking.

Modern Data Lakehouse Pipeline using Azure ADF, Databricks, and Delta Lake

Apr 2025 – Aug 2025

- Built end-to-end data engineering pipelines using Azure Data Factory for orchestration and Azure Databricks (PySpark) for processing.
- Implemented Medallion Architecture (Bronze, Silver, Gold) and Unity Catalog for scalable data transformation and governance.
- Designed dimensional data models and implemented Slowly Changing Dimensions (SCD Type 2) for historical data management.

Certifications

- Databricks Certified Data Engineer Associate - Databricks (2025)
- Microsoft Certified Fabric Data Engineer Associate - Microsoft (2025)

Education

Bachelor of Technology in Computer Science and Engineering

Graduation: 2025

Chitkara University, Himachal Pradesh

CGPA: 8.2/10.0
